

Mr. W. Campbell

30 November, 1983

I feel that the text of Mr. Atkinson's interview for Science Dimension is well-written and there are only a few very minor corrections which I have marked on the manuscript.

On page 1, note that I came to Canada in 1935.

On page 4, I would prefer to give the dimension of the H_3^+ molecule in Angstrom units, not in nanometers, since it is the more usual custom in spectroscopy and since I have been a strong defender of the Å unit against the inroads of over-zealous opponents.

On the same page, it was not a special scale that I used but just an ordinary ruler with the mm scale on it. That accounts for my correction.

On page 6, we have followed up on H_3O but have so far not been successful in finding a spectrum.

Thank you for your trouble in this matter.
