Dr. J.L. Locke,
Herzberg Institute of Astrophysics

Although our latest Annual Report has barely been tabled, it's already time to harvest research highlights for the next one. The 1979-80 model promises to follow the "downsized" format of its predecessor.

Would you please give some thought to possible submissions from the Herzberg Institute of Astrophysics within the next two weeks? As usual, perhaps six or seven items along with a paragraph describing each would be appreciated. Many thanks.

Wally Cherwinski,
Public Information Branch.

Dr. I. M. Dismick

Dr. Herzberg ✓ - told many answers is covered by Dr. Douglas's, 19/11

Dr. Douglas - Triatomic hydrogen & fluorine monoxide were given in his reply.

Dr. M. Namara

N. W. Broten

Dr. Ramsay

Dr. Van der Burg

Dr. Gault

Your suggestions please ASP.
