

Dr. P.A. Redhead

1 August 1974

A visit from Dr. Karpukhin to the Spectroscopy Lab. any time in the period indicated would be acceptable. It appears, however, that Dr. Karpukhin's interest is mainly in plasma physics and there is little in this field that we can offer him.

Both Dr. Douglas and I shall be away from Ottawa during most of the first two weeks of September.

G. Herzberg

c.c. Miss M.N. Bedard
