

23 August 1978

Mr. A.A. Kugler

In reply to your memorandum of 21 August, Dr. Movsesyan would be welcome to visit the spectroscopy laboratory for any part of his proposed five-day stay at NRC in October.

With regard to the timing of the visit, I shall be returning from an extended trip to Europe only on 16 October. Dr. Oka expects to be in Ottawa all that month. Dr. Douglas has just started his vacation and I have no information about his possible commitments in October. However, if he should be away at the time of Dr. Movsesyan's visit I am sure that other members of the group will be available.

G. Herzberg

c.c. Dr. J.L. Locke

Dr. A.E. Douglas
